EMPLOYMENT HISTORY

UI/UX Designer/Frontend Developer · 3RDRETAIL AFRICA

2018- present

- Redesign of the entire website of 3rdretail Africa to compete favorably with an improved UI and User experience.
- Improved the brand dashboard experience of the product which makes brands see resellers within their industry to pitch to rather than its' formal experience of pitching to resellers outside their industry. This recorded a significant increase in sales conversion and improved the company's revenue.
- Built the UI with Reactjs, React Hooks and also in collaboration with 3 other Engineers for the implementation of the Ux designs.
- Regularly prepared reports and presented them to management teams.

UI/UX Designer · SUJUMOTO

2022-2022

- Conducted an Unmoderated Usability Study on an existing product of the company. This was done by passing scripts of the actual task that need to be completed to the participants. From the feedback, I was able to make adjustments to the website design which increased the loading speed, Improved the user experience of users, and increase the website traffic by 70%.
- I worked Actively with the team of software engineers for the thorough implementation of the modified designs.
- I designed a Winner Suggestion System which lifted the burden of manually querying the database by the Engineers which saved lots of time and stress.

UI/UX Designer/Frontend · Rejuvenate360.

2017 - 2019

- Validated user input and consumed some RESTFUL APIs.
- Worked on E ride-hailing 62miles frontend.
- Worked on the Frontend for Flashgas Nigeria.
- Ensured technical feasibility of UI/UX Designs and modified existing UI for the company's products.
- Optimized applications for speed and scalability and ensured collaboration with other team members
.

LEAD AUTOCAD ENGINEER · MOLCOM

2016 - 2017

- Tower Auditing and Sectional Mapping checks.
- Drafted sectional sketches of the tower and its members.
- Reviewed AutoCAD Drawings and ensured they correlated with audit and mapping reports.
- Vetted reports from the FSEs before submission and took inventory of materials.
